

Transport guideline

Please note

Amended transport regulations have applied to cross-border vehicle transport from Germany and Austria to another EU state since 05.09.16. All the steps, which you need to observe under the new regulations, are listed below.

Please carry out steps 1 – 5 if:

- You have bought one or more vehicles at an auction through Autobid.de in Austria or Germany,
- You would like to transport this vehicle into another EU country,
- You already have the invoice for the vehicle and
- You would like the reimbursement of statutory value added tax.

1. Visit the autobid.de website and under „Service“ > „Vehicle transport“ select the menu point „from Germany and Austrian into other EU states“ or use the URL: <http://www.autobid.de/index.php?id=393>
2. Select one or more partners from the freight forwarders list, based on the destination of the transport, and contact the latter via the link or e-mail address shown on the list.
3. Instruct your selected partner from the freight forwarders list with the transport of your vehicle.
4. As soon as the vehicle arrives at the destination, please ensure that all the documentation for the reimbursement of value added tax is provided, including the fully completed consignment note (CMR) as well as the certification for value added tax purposes (the document can be found on the download centre under menu point Service).
5. Please make a copy of this documentation and send it by e-mail to clearingstelle@auktion-markt.de.
6. If the documentation sent by email is confirmed as being correct, please send the original certification to us by post.
